

INTRODUCING OUR SOLUTIONS FOR

SELF-SERVICE DOCUMENT SCANNING & DEPOSIT

/unixfor...

Did you know there is a way to scan documents, store them safely and make them ready for process? And all done for you by the document owners themselves?

Meet our self-service document Scan & Deposit solution!

A new channel for your users to scan their documents (A4 size, original or photocopies), deposit them, transform the physical papers into a booklet and store them and have the solution send the e-copies instantly for further process!

Official documents | Contracts | Applications

HOW CAN IT BE USED?

Identify using a card, fingerprint, barcode, RFID tag or simply type in your username and password Insert your A4 documents, one by one to be scanned Preview each scan, to confirm or alter its 3 properties Collect your confirmation receipt – your copies 4 will be instantly forwarded to the right department for process

Changed your mind?

You can cancel & collect what was inserted.

Forgot to collect your documents?

Don't worry! ADSS SAD will retract it.

You can also add a payment, both card or cash!

WHO CAN BENEFIT?

Both end-users & organizations! This new self-service channel

Allows end-users to be served over a wide, geographically distributed, low cost network

Serves transactions any day & time (24x7)

6 Improves organization's productivity and image

8-8 Shifts the personnel productivity to other more demanding 8 tasks

COMPONENTS OF THE SOLUTION

Document Scan and deposit app

A powerful Business Software Application that ensures seamless operation between the user, the ADSS SAD kiosk and the back-office. It interacts with the end-user through a smart interface allowing his identification and document deposit. It supports all the necessary administrative operations (daily reports, consumables replenishment). It can also enable payments (card and cash).

ADSS SAD

Innovative kiosk design, built with state of the art peripherals, equipped with Unixfor's Sense & Control unit and our custom designed mechanisms for document alignment, stapling and processing . ADSS PAS kiosks are a reliable, highly effective while low-maintenance document handling solution, combining document deposit generation to payments.

Total Care

The ultimate software platform for remote monitoring & management of your installed self-service kiosk.

Customization, integration, training & support services

We'll make sure to fine-tune, integrate and finalize the solution, based on the existing infrastructure, train you and support you.

APPLICATION FUNCTIONALITY AS AN INDICATIVE TRANSACTION FLOW

Tailored

business application

REQUIRED CONNECTIVITY

Tailored Business Application functionality as features

Multiple identification methods (camera, fingerprint scanning, card, RFID/NFC, barcode, document scanning)

Optimum interactive service flows, guide user to insert and scan his documents, avoiding mistakes

Double sided color scanning, offering preview and confirmation for every page scanned

Offers the option to cancel and return scanned documents

Tools for the administrative personnel (cash balance, reports, kiosk health check)

Diagnostic tools for the technical team

Functionality for the personnel

Functionality

for the user

Tailored software application Remote

ADSS SAD Services

AVAILABLE KIOSK CONFIGURATIONS

Tailored business application Remote monitoring & Services platform

ADSS SAD SL

ADSS SAD PL

ADSS SAD CL

ADSS SAD SL

- →19" touch monitor
- \rightarrow A4 laser printer with locking paper trays
- \rightarrow A4 double sided color document scanner
- \rightarrow Aligning & stapling mechanisms
- → Document storage Box
- → Document escrow mechanism for multiple document return upon cancelation
- →PC
- → Speakers
- → Locking mechanism
- → Sense & Control unit (to monitor & manage sensors, switches etc.)

Additional packs

- → ID Pack : Includes contact/contactless card reading, barcode scanning, fingerprint reading
- → Forms Pack : Includes metal keyboard, signature pad
- → Remote help Pack: Includes web camera and handset

ADSS SAD PL/CL

- →19" touch monitor
- \rightarrow A4 laser printer with locking paper trays
- \rightarrow A4 double sided color document scanner
- \rightarrow Aligning & stapling mechanisms
- → Document storage Box
- →Document escrow mechanism for multiple document return upon cancelation
- → Banknote acceptor or recycler with various cashbox capacity options
- \rightarrow Coin acceptor on the CL series
- →PC
- → Speakers
- →Locking mechanism
- → Sense & Control unit (to monitor & manage sensors, switches etc.)

Additional packs

- → ID Pack: Includes contact/contactless card reading, barcode scanning, fingerprint reading
- → Forms Pack : Includes metal keyboard, signature pad
- → Remote help Pack: Includes web camera and handset

UNIXFOR SENSE & CONTROL

Sense & Control is an intelligent management unit, designed by UNIXFOR monitoring all sensors and driving all mechanisms, including:

- → *Mainboard*: Printed Circuit Board monitoring all sensors and driving all mechanisms.
- → Document Detectors
- → *Escrow:* Temporarily stores the A4 scanned sheets
- → *Stapling Mechanism*: Custom-designed subsystem for stapling A4 sheets before deposit
- → Moving Mechanisms: Two separate designs forwarding documents from the Scanner to the Escrow & from the Escrow to the Stapling Mechanism
- → *Aligning Mechanism*: To make sure all hardcopies are in the right alignment for stapling
- → *Stopper Mechanism*: Designed to stop and support sheets at the document exit
- → *Retracting Mechanism*: Electromechanical subsystem that retracts documents when forgotten at the Exit slot and stores them
- \rightarrow Door switches
- → Sound volume
- → Temperature

Remotely monitor, control and manage any size of kiosk network

Maximize operational availability & reduce cost and response time

- → Collects real time status information for all connected terminals, servers, connected hosts, etc.
- \rightarrow Provides online consumables availability
- → Forecasts replenishment needs
- → Enables remote investigation of issues and troubleshooting
- Automatically sends alerts through text messages or emails when critical events occur
- \rightarrow Distributes and applies software updates automatically, over the network
- \rightarrow Provides availability statistics reporting for the entire kiosks network
- → Accessible from anywhere using any browser

Sense & Control is directly connected to TOTAL CARE Platform reflecting online the status of each sensor, switch or mechanism

CUSTOMIZATION, INTEGRATION, TRAINING & SUPPORT SERVICES

As a future part of your infrastructure, we make sure our solution is be tailored to fit your needs and we ensure a seamless integration between all involved parties offering the required integration services.

 Business Application Customization Specs collection & consulting Localization Fiscalization UI & Branding Detailed flows 	 Integration with 3rd party systems Specs collection & consulting Interface development ERP, DMS, Government Databases, Citizen registry or other services 	 Integration with locally certified card payment application Specs collection & consulting Interface development local card payment application & certified hardware 	Tailored business application Remote monitoring & Services
Offering the tools and the right training you are enabled to act as a single point of service for your customers	 Remote management & monitoring platform Requirements & architecture Consulting Setup configuration Training 	 Partner training Kiosk installation Kiosk maintenance & troubleshooting Kiosk operator procedures Business application Partner support procedures 	management platform
